HELP DEVELOP AFRICA'S FUTURE SOFTWARE START-UPS

TECHNICAL TEACHING FELLOWSHIP IN AFRICA

Meltwater Entrepreneurial School of Technology (MEST) is recruiting students and recent graduates with a strong background in software engineering and a keen interest in teaching and sharing their knowledge with talented graduates in Accra, Ghana for a one-year assignment.

YOUR QUALIFICATIONS SHOULD INCLUDE:

- Programming proficiency in at least one of the following languages: Java, C++, C#, PHP
- Experience with relational databases and SQL
- Knowledge of Object Oriented Programming
- Interest and/or passion for teaching
- Ability to work in a team
- Good verbal and written communication in English
- Bachelor's degree in computer science or related field
- 2 - 3 years of programming experience

WHAT'S COOL ABOUT THIS JOB

- Gain valuable work & life experience in an entrepreneurial organization working to make a difference.
- Gain international work experience
- Make the world a better place - contribute the knowledge and skills transfer to talented Africans
- Develop relationships with Africa's future leaders

COMPENSATION:

- \$1000 (USD) monthly stipend
- Travel, Housing, Meals and Emergency Health Insurance

MEST is a not-for-profit project fully funded by Meltwater Group, a Norwegian software company headquartered in San Francisco, USA. We believe that with the proper training and support Africans can successfully set up new software companies generating jobs and wealth locally.
